-

PROJECTS:

Seitonym: <https://github.com/shawhien/Seitonym>

April 2020

- Utilizes C# and Unity
- Created a basic open-world Action RPG with a custom made sandbox map utilizing Unity including everything from combat to running and death animations.

Fetch: <https://github.com/shawhien/Fetch>

April 2020

- Used React.js and Javascript to develop a Tinder/Hinge-like app for a Hackathon in 24 hours with a focus on connecting people based on pictures of your dogs and information about you.
- Placed in top 3 at a Hackathon in a team of 2 UX designers and 2 developers.
- 1st place in presentation as the sole presenter of the group

GiveBack: <https://github.com/shawhien/GiveBack>

March 2020

- Utilizes React.js for the front-end and MongoDB/Mongoose for the back-end (MERN stack)
- Organizations can create accounts to create events that need potential volunteers.
- Users can create accounts to view volunteering opportunities in their area to have an easier way of giving back to their community.

Showstopper: <https://github.com/shawhien/Showstopper>

February 2020

- Built using Javascript for the front-end and SQL/Sequelize for the back-end
- Search for your favorite song or artist and find if there are any concerts happening near you.
- Add them to your favorites list and keep track of all of your favorite artists.

Erobus' Dungeon: <https://github.com/shawhien/Erobus-Dungeon>

February 2020

- Built using Javascript with an emphasis on JQuery.
 - A single player deep-dungeon turn taking RPG where your hero will travel through an infinite dungeon gaining levels and becoming stronger all while having the enemies grow with you in level.
-

PROFESSIONAL EXPERIENCE:

Extol, Hayward, CA
